## NEW ZEALAND'S BEST KNOCK DOWN SIGN MOUNTING SYSTEM

# VERTIFLEX

**"A knock down sign that overcomes the deficiencies in other rebound systems on the market – not all systems perform equally"**

Proline, a leader in road safety products, has manufactured the VERTIFLEX knock down sign mounting system for over eight years. This product ensures delineator posts and signs always return to their designated position. The VERTIFLEX completely white construction provides optimum target value and is designed for sign mountings on traffic islands, road sides, parking buildings or other applications where vehicles are likely to "knock down" signs or posts in vulnerable positions.

### **SAFETY - 100% POSITIVE DIRECTIONAL RETURN (POST/SIGN)**

The sign will not point in an undesired direction thus avoiding potentially dangerous situations.

### **STANDARD HOLE MOUNTING PATTERN**

It will fit most existing bolting patterns.

### **ALL METAL COMPONENTS**

Stainless steel or zinc plated  
Long life and robust design especially suitable for coastal applications.

### **OPTIMUM VISIBILITY**

White polymer base and post -  
Creates the optimum visual value.  
For aesthetic considerations other colour options available on request.

### **SIMPLE ASSEMBLY/DISMANTLE**

Very user friendly requiring only a spanner and screwdriver to replace post/sign (and without removing base bolts).

### **EASY REPLACEMENT OF PARTS**

Replacement parts available so easily repairable if the eventuality requires - saving money on replacement of the total system.

### **FREE OF INTERNAL CABLES**

So no fray or snap issues  
Spring system lasts longer than conventional designs.

### **360° IMPACT CAPABILITIES**

Will sustain impacts from any direction meaning optimum safety achievable.

### **PERMANENTLY WELDED TOP CAP**

Aesthetic and functional  
Not only visually appealing but also helps ensure longer life of working components.

### **UV STABILISED**

Proved in New Zealand's harsh climate for over eight years.

### **MOULDED LOGO OPTION**

Increase your companies brand in the competitive marketplace.

### **ROBUST CONSTRUCTION**

Withstands impacts tested up to 100km/h.

### **OPTIONAL POST LENGTH**

Post lengths delivered to required length.
